SUMMARY

Computer Science graduate from Georgia State University with a strong foundation in software development and data systems, seeking an entry-level role in data engineering, backend development, or database engineering. Skilled in database design with PostgreSQL, and proficient in Java, Python, and other programming languages.

EDUCATION

Georgia State University   **August 2020 – May 2024**
Bachelor of Science , Computer Science   *Atlanta, GA*
Relevant Coursework: Programming Language Concepts, Software Engineering, Data Structures, Database Systems

EXPERIENCE

Apiscor Technologies, Inc.   **March 2025 – Present**
Help Desk Engineer Intern   *Suwanee, GA*
- Automated routine tasks using **Powershell scripts**, streamlining operations by 30%
- **Diagnosed** and **document** issues across OS-level tools and hardware interfaces
- Contributed in **Agile meetings** to enhance system stability and reduce incident rates

PROJECTS

PropertyHub
PHP, MySQL, JavaScript, HTML, CSS   **Jan 2023 – May 2023**
- Developed a dynamic web application to facilitate property listings and searches, utilizing PHP for server-side logic and **MySQL** for database management
- Applied **performance optimization techniques**, such as caching and efficient database indexing, to improve the application's scalability and speed

Personal Website   **March 2024 – Present**
Next.js, React, Vercel, Tailwind CSS, Python, Flask
- Developed a **mobile-first** personal portfolio website using Next.js and React, ensuring a responsive experience across devices, and hosted on Vercel for seamless deployment
- Integrated a Flask-based backend to handle contact form submissions securely and facilitate **dynamic content rendering**, ensuring a smooth and interactive user experience
- Implemented **server-side rendering** and **static site generation** to optimize performance, resulting in faster load times and improved search engine optimization

TECHNICAL SKILLS

Languages: Java, Python, SQL, HTML, CSS, JavaScript, C/C++
Tools: Git, GitHub, VSCode
Databases: PostgreSQL, MySQL
Frameworks: Flask, React.js, Next.js
Systems & Concepts: Agile, Object-Oriented Programming, Debugging
